Charming flower in scarlet and violet with white center veins.
Huge flower in deepest bronze-orange. Violet throat.
Similar to Hermosissimus but with broader petals.
Very large molten gold with flame and violet heart.
A heroic and beautiful rose-beige with fine fragrance.
Chamois-coral shadowed with cinnabar.
Large brilliant persimmon lightly margined in violet.
Very large and flat star-like scarlet orange with violet shading.
Outer petals cherry-orange and violet. Inner petals lilac.
Lovely flower, outer petals deep red; inner petals violet and white.
Two-toned carmine. Has appearance of red and yellow stripes.
Small chiffon white with canary sepals.
Very dainty flower in softest pink. Starlike form.
Huge violet and cerise with lime yellow eye.
Beautiful shell pink basket type.
Many-petaled lilac-pink flower beautifully adapted to baskets.
A large flower of crepe-like texture in soft pink feathered in white.
Many-petaled 10" flower in molten gold. Bronze sepals.
Pink, gold and purple. Effect of brilliant iridescence.
Double bells of rose-cinnabar. Basket type.
Broad petaled flower in royal purple and cerise.
Huge glowing bronze-gold with wide violet margins.
Orange tinged with scarlet. White stigma and anthers.
Rosy lavender deepening to violet with age.
Many petaled chiffon white. Creamy-beige sepals and chartreuse eye.
A glorious flower of molten gold and violet. Vermillion eye.
Immense flower with many slender orange petals margined in flame.
Double, cupped, narrow petals in blue-lavender and orange-violet.
Large two-toned scarlet orange with vermillion eye.
Cherry-orange and violet. Scintillantly beautiful.
A flat open flower of softest silvery pink.
Bright red with small purple eye. Suggests tulip in form.
Very large and sparkling white with yellow and brown margin petals.
Large and most vivid gold of all, violet-vermillion shaded.

EPIPHYLLUMS

Of all the beautiful flowering plants imported from the four corners of the earth, none can excel in spectacular appeal the epiphyllums. Although native to the tropical countries such as Brazil, Mexico and the Argentine, the majority of these gorgeous types have in the past been hybridized in Europe. And now in our own Southern California numerous, superior kinds are being developed.

One could imagine nothing more congenial to Southern California climate and modern day architecture than these streamlined plants bearing a profusion of strikingly beautiful flowers from 6 to 10 inches in diameter, in all the colors of the rainbow. There are white kinds fringed in lime yellow and soft brown, pinks in monotone or iridescent tints, purples with flame and chartreuse, molten gold with vermillion, bronze with scarlet, blood-red with violet and others too numerous to mention.

Some types are effective in wall or hanging baskets, but the majority display their charms to best advantage when trained against a trellis or wall.

Our "Jeweled Corridor" during May and June presents a spectacle of dazzling beauty that you cannot soon forget.

RARE PLANT GARDENS

EPIPHYLLUMS

CULTURE

For best results, plant your Epiphyllums in a semi-shady location in a mixture of 1/3 good sandy loam and 2/3 well rotted oak leafmold. Add 1 teaspoon of bonemeal to the soil mixture for a 6-inch pot and proportionately more for larger containers.

Give them a heavy dressing of steer fertilizer in February and a light top-dressing of a good commercial fertilizer in August.

Keep them moderately moist, varying with the seasons, and be sure that their drainage is good.
